"Identification and cloning of GCAI, a gene that encodes a cell
surface glucoamylase from Candida albicans.";
Med. Mycol. 37:357-366(1999).

-!- CATALYTIC ACTIVITY: Hydrolysis of terminal 1,4-linked alpha-D-
glucose residues successively from non-reducing ends of the chains
with release of beta-D-glucose.

-!- SUBCELLULAR LOCATION: CELL WALL ASSOCIATED.

-!- SIMILARITY: BELONGS TO FAMILY 31 OF GLYCOSYL HYDROLASES.
                                                                                                                                                                                                                                                                                                                                                                 EVVHNSYAQSRTLVISKVVLMGHRSPAAPKKLTVHVNSAEVEASSSAGTRYQNAGGLGGV

Biosci. Biotechnol. Biochem. 59:1516-1521(1995).
-:-FUNCTION: Hydrolyzes malto-olligosaccharides, but has a low activity toward soluble starch.
-:- CATALYTIC ACTIVITY: Hydrolysis of terminal, non-reducing 1,4-lincose residues with release of D-glucose.
-:- INDUCTION: By maltose.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 (POTENTIAL).
